MULTI™ BALANS®

Design: Peter Opsvik

Balans® concept: Hans Chr. Mengshoel

## Our philosophy:

Variér® chairs are the product of a human idea. We make the human body central to design, learning it by heart. We know which positions promote relaxation, and where and how to support the body. The human body is designed for motion, and should never be still for too long. We make chairs that meet all these needs, and then we free our human imaginations to create bold, unconventional forms with perfect functionality.

Wherever you're going and whatever you're doing, take the Multi balans® along. This multi-function sitting instrument is portable, height adjustable and supports a range of sitting positions, so you never know when it will come in useful.

Designed to create an open angle between the torso and thighs, the Multi balans® gives you the freedom to decide just how open that angle should be. At its steepest setting, the Multi balans® places almost as little strain on the back as a standing posture, while at its lowest it can function as a child's chair and worktable in one. In any position your spine is in its natural, dynamic curvature while your torso needs to find its own equilibrium. This will strengthen your back muscles and your chest is kept open for deep breathing. But this remarkable chair's flexibility doesn't end there. Because it is light enough to easily carry, and it folds up flat so you can hang it or stow it up against the wall.
