

time in MOTION

WING™ BALANS®

Design: Peter Opsvik

Balans® concept: Hans Chr. Mengshoel

Our philosophy:

Variér® chairs are the product of a human idea. We make the human body central to design, learning it by heart. We know which positions promote relaxation, and where and how to support the body. The human body is designed for motion, and should never be still for too long. We make chairs that meet all these needs, and then we free our human imaginations to create bold, unconventional forms with perfect functionality.

The seconds are ticking away, and the deadline is looming, but your productivity is still high. The Wing balans® promotes active sitting and keeps you breathing deeply, giving your energy levels and powers of concentration an invaluable boost.

The Wing balans® supports you in the open balans® 'kneeling' posture instead of the erect or right-angled posture imposed by traditional office chairs. This creates a balanced torso and allows your spine to find its natural curve while strengthening your back muscles. With an open angle between torso and thighs breathing and thus oxygen supply is enhanced. The casters make it ideal for work that involves a lot of movement. They are flexible, so the chair responds to your body weight to tip you forwards or backwards, encouraging regular shifts in posture. The Wing balans® also comes with an adjustable gas lift, making it easily adjustable to a range of activities and different desk heights.

VARIÉR®
A HUMAN IDEA

WING™ BALANS®

At desk: The upright kneeling position frees the body to adopt its natural curvature; breathing is enhanced and pressure on the spine is minimized.
